#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

The finality of the last office action has been vacated. A new office action on the merits appears below.

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Takamatsu (4,036,524) in view of Bolewski (DES. 365,958). Takamatsu discloses the use of a seat (10) including a seat portion (11) and an attached seat back portion (12); a top (19), having a lower end, fitted over the seat back portion and a uniform bottom (17), having a rearward end, fitted over the seat portion; an engagement assembly (21a) carried by one of the lower end of the uniform top and the rearward end of the uniform bottom; a complementary engagement assembly (21b) carried by the other of the lower end of the uniform top and the rearward end of the uniform bottom; and the engagement assembly detachably engaged to the complementary engagement assembly detachably engaging the lower end of the uniform top to the rearward end of the uniform bottom, see figures 1-2. Takamatsu shows the use of all the teachings of the claimed invention but fails to show the use of a top and bottom supporting uniform adornment that

Art Unit: 3636

identifies a member of an organization. Bolewski teaches the use of a top and bottom supporting a uniform adornment that identifies a member of an organization, see figure 1. It would have been obvious to one of ordinary skill in the art at the time of invention to modify the uniform top and bottom with adornment as taught by Bolewski, in order to support and show team spirit to the organization.

Claims 3-5 rejected under 35 U.S.C. 103(a) as being unpatentable over Takamatsu as applied to claim 1 above, and further in view of Estes (4,694,511). Takamatsu shows the use of all the claimed invention but fails to show the use of and arm openings on either side the neck openings. It would have been obvious to one of ordinary skill in the art at the time of invention to modify the apparatus with arm openings as taught by Estes, in order for the occupant to wear the top.

### ***Response to Arguments***

3. Applicant's arguments with respect to claims and 3-5 have been considered but are moot in view of the new ground(s) of rejection.
